

## README for gas\_toolbox

Please check our GitHub page ([https://github.com/dnicholson/gas\\_toolbox/releases](https://github.com/dnicholson/gas_toolbox/releases)) for the most recent version of these functions. We plan to add more gases and gas exchange parameterizations to the gas\_toolbox in the future.

These MATLAB functions are provided as supporting information to the publication Manning, C.C., R.H.R. Stanley, D.P. Nicholson, and M.J. Squibb (2016). Quantifying air-sea gas exchange using noble gases in a coastal upwelling zone. *J. Phys. Conf. Ser.* (In Proceedings of the 7th International Symposium on Gas Transfer at Water Surfaces)

If you use these functions in a publication, please cite or acknowledge our paper or our code, and also cite the references listed in the headers of the individual functions.

**Example citation:** Manning, CC and DP Nicholson (2016). gas\_toolbox: MATLAB code used in Manning et al. GTWS-7 proceedings. Zenodo. DOI: [10.5281/zenodo.45293](https://doi.org/10.5281/zenodo.45293)

### Purpose

These functions calculate the air-sea flux of several gases using various gas exchange parameterizations, including three that explicitly include bubble-mediated exchange.

### Gases currently supported

He, Ne, Ar, Kr, Xe, O<sub>2</sub>, and N<sub>2</sub>.

### Gas exchange parameterizations currently supported

*With explicit bubble-mediated flux:*

fas\_S09: Stanley et al. 2009

fas\_N11: Nicholson et al. 2011

fas\_L11: Liang et al. 2013

*Without explicit bubble-mediated flux:*

fas\_Sw07: Sweeney et al. 2007

fas\_Fd includes

- W14: Wanninkhof 2014
- W92a: Wanninkhof 1992 - averaged winds
- W92b: Wanninkhof 1992 - instantaneous or steady winds
- Sw07: Sweeney et al. 2007
- Ho06: Ho et al. 2006
- Ng00: Nightingale et al. 2000
- LM86: Liss and Merlivat 1986

Please see the MATLAB function headers for the full citations for each parameterization.

Use of these functions requires installation of the Gibbs-SeaWater (GSW) Oceanographic Toolbox, Version 3.04 or newer (released 20th December 2013), which is available at <http://www.teos-10.org/software.htm>.
